SUMMARY

Fresh graduate with a Bachelor's degree in Information Technology from the Technological University of the Philippines, with internship and project experience in software application development and business solution implementation. Skilled in full-stack web and mobile development using JavaScript, TypeScript, React, Node.js, Python, Java, PHP, and SQL, with experience in database management, REST API integration, debugging, and application testing. Strong analytical and problem-solving skills, with a keen interest in developing practical, user-focused solutions and learning new technologies.

EXPERIENCE

IT Intern

Telstra Foundation Philippines

2026 - 2026, Makati Philippines

- Developed an application using Microsoft Power Platforms, digitizing and automating manual workflows, improving document and data management, and collaborating with stakeholders to deliver a user-friendly business solution.
- Conducted system testing and gathered end-user feedback to identify usability issues, resulting in iterative improvements to the application prior to launch.

PROJECT

NoiseWatch: Reporting and Mapping Disruptive Urban Noise

noisewatchapp.vercel.app/

- A community-driven platform that lets residents record, analyze, and report noise disturbances directly to their barangay — backed by real-time AI audio analysis and GPS location tagging. Detects and ranks the sources behind a recording (music, traffic, construction, etc.), measures decibel level and distance, and flags likely violations such as entertainment noise during quiet hours, turning a raw audio clip into a barangay-ready report.
- Engineered a community platform using React and AI audio analysis to capture, classify, and map urban noise events with GPS tagging, generating actionable, data-backed reports for barangay officials.

CircuitHub

python-frontend-9vgt.onrender.com

- Designed and built a web-based inventory management system for electronic components, featuring real-time stock monitoring, automated low-stock alerts, full CRUD operations, and downloadable PDF analytical reports.
- Integrated user authentication and role-based access controls using Flask and JWT, enhancing data security and restricting sensitive inventory features based on account permissions.

Captivity and Care

github.com/carla-io/animalMobile.git

- Jewel Mobile application for recording animal behaviors, monitoring health, reporting issues, and scheduling veterinary appointments.
- Implemented push notification functionality for real-time alerts on animal health checks and scheduled appointments, improving responsiveness for caregivers and veterinarians.

Jewel

github.com/carla-io/jewel2.git

- Mobile shopping application for jewelry products utilizing full CRUD operations for product management.
- Developed a responsive UI with intuitive navigation using React Native, enabling seamless browsing of jewelry collections across various device sizes and operating systems.

EDUCATION

Bachelor of Science in Information Technology

Technological University of the Philippines • Taguig City • 2026

Senior High School – General Academic Strand

Dr. Arcadio Santos National High School • Paranaque City • 2022

CERTIFICATIONS

Fundamentals of Artificial Intelligence

2026

- Gained foundational knowledge of AI concepts, machine learning principles, and real-world applications of intelligent systems.

AI for Learning and Future Careers

2026

- Explored practical applications of artificial intelligence, emerging industry trends, and the impact of AI on future career opportunities.

Data Visualisation Mastery in R: Telling Your Story

2026

- Developed skills in creating compelling data visualizations and communicating insights using R and data storytelling techniques.

R for Everyone: An Introduction

September 2025

- Completed an online course using R and RStudio for data analysis and data manipulation.

Introduction to Generative AI and Prompt Engineering

2025

- Learned techniques for crafting effective prompts to enhance AI-generated outputs.

SKILLS

Programming Languages: JavaScript, Python, Java, SQL

Web Technologies: HTML, CSS, React, Node.js

Databases: MongoDB, SQL

Tools & Platforms: GitHub, VS Code, Microsoft Office, Microsoft Power Platform

Other Skills: API Integration, UI/UX Design, Debugging, Low-Code Development, VB.NET
